Table 1

[illegible]

As part of the preliminary work to make good the results, including the assessment and the identification of the causes of the problems, the following steps were followed:

1. The identification of the problems and the causes of the problems.
2. The identification of the causes of the problems.
3. The identification of the causes of the problems.

The results of the preliminary work are presented in the following table:

Problem	Cause
1. The identification of the problems and the causes of the problems.	1. The identification of the problems and the causes of the problems.
2. The identification of the causes of the problems.	2. The identification of the causes of the problems.
3. The identification of the causes of the problems.	3. The identification of the causes of the problems.
